

## PREFACE

I, Mayor Ken Schultz, do hereby authorize that these Standard Specifications shall be used as the construction standards for all City of Albuquerque, public works construction, as well as the standard construction requirements for subdivision infrastructure to be dedicated to the City, force account construction or maintenance, and private infrastructure construction within any public right-of-way or easement.

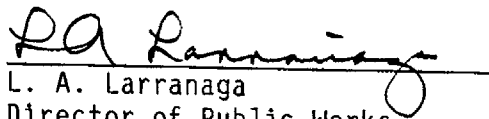

These Standard Specifications have been bound in a loose-leaf format to facilitate updates in requirements and technical standards, when necessary. Any such updates will be only be effective if authorized by the Director of Public Works. Updates which are issued prior to April 1, 1988 will be mailed to registered holders of these specifications, at no additional charge. Subsequent to April 1, 1988, specification holders will be notified of updates, however an additional fee will be charged to cover the cost of processing each update.

Users of these specifications may submit comments and recommended changes or additions to these specifications to the City of Albuquerque, P. O. Box 1293, Albuquerque, New Mexico 87103; Attention: Chief Design Engineer, PWD/Engineering Group.

ENGINEERING/DESIGN

MARCH 1986

### ACKNOWLEDGEMENTS

The Public Works Department, Engineering Group, on behalf of the City of Albuquerque, wishes to express sincere appreciation to the many individuals and corporations within the public works construction community who donated their time and resources to the compilation, review and editing of these specifications. This process included participants from all sectors, including developers, contractors, material suppliers, consulting engineers, private utility companies, other governmental agencies and City staff. As they all know, the evolution of this document started in the spring of 1984, with amendments to the "New Mexico Standard Specifications for Public Works Construction, 1979 Edition" published by the New Mexico Chapter of the American Public Works Association, and has required an "Interim Standard Specification" and numerous hours of meetings and review to get to this publication. We recognize the commitment to improving the Public Infrastructure that is represented by this effort, and look forward to your continued support and involvement in maintaining this investment.
